Vinyl Shower Enclosure Kit

PLEASE READ INSTALLATION INSTRUCTIONS COMPLETELY BEFORE STARTING.

Installation Support Hotline 1-844-743-5140

300 SERIES (4 x 6)

Thank you for purchasing the Liquid Sunshine Outdoor Vinyl Shower Enclosure Kit. Please read installation instructions completely before assembling your enclosure.

Consider the following Layout Options:

Note: Partition Walls are available for this 1. *Optional 4th Wall* *Special Order* 14" 6" Optional 14" Partition 50-1/4" 42-1/4" Hiney Hider 30-1/4" -36-1/4" Rough Openin 78-1/2" 2. *Optional 4th Wall* *Special Order* Optional 14" Partition 50-1/4" 42-1/4" Hiney Hider 30-1/4" 36-1/4" Rough Opening -78-1/2"

IMPORTANT:

Before you begin...

• Check Local Zoning Laws.

Zoning laws may restrict the location and height of your enclosure, permits may also be required.

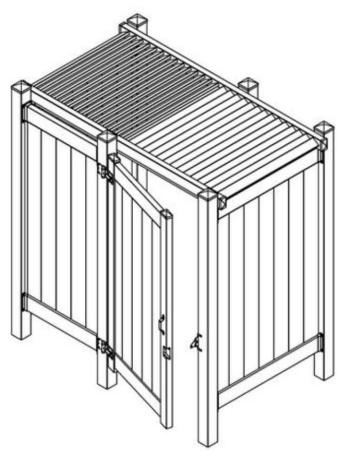

Underground Utilities.

Dial 811 and pay to have underground utility lines marked. Even at shallow depths utility lines can be present.

 Check that all tools and materials are present to properly assemble your enclosure.

Models with Louvered Roofs:

Vinyl posts, excluding partition posts, must be cut to 90" instead of 84" to accommodate for Louvered Roof assembly. (See page 8)

Installation Support Hotline / www.outsideshower.com

Tool List:		Additional Tools Required for:
	 □ Circular Saw / Hand Saw / Chop Saw □ Line Level □ Post Level □ Tape Measure □ Ratchet Set □ Drill Gun #2, #3 Phillips □ Driver Bit Extender (Recommended) 	GROUND FOOTING INSTALLATION: Post Hole Digger (Auger Re Shovel Pre-Mix Concrete (6 Bags) 4x4 by 96 Lumber (6x) CONCRETE/WOOD DECK MOUNT INST
	 ☐ Hammer ☐ Rags and Spray Cleaner ☐ Safety Glasses ☐ Black Sharpie or Carpenters Pencil 	 □ Hammer Drill □ Masonry Drill Bit □ Impact Gun / Ratchet Set □ Cement Fasteners (4 / Post) Wood Deck:

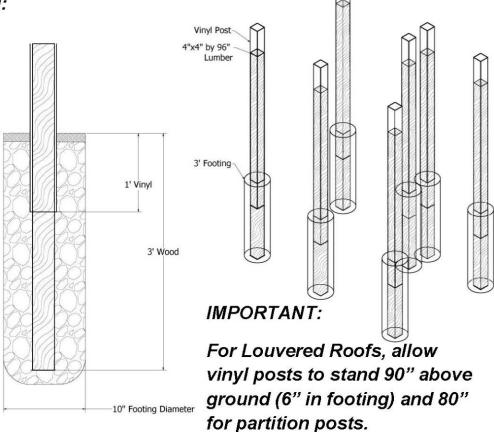

Recommended) 5) STALLTION: st) ☐ Wood Drill Bit □ Wood Fasteners (4 / Post) 1. Measure and Mark Post Layout

2. Post Installation

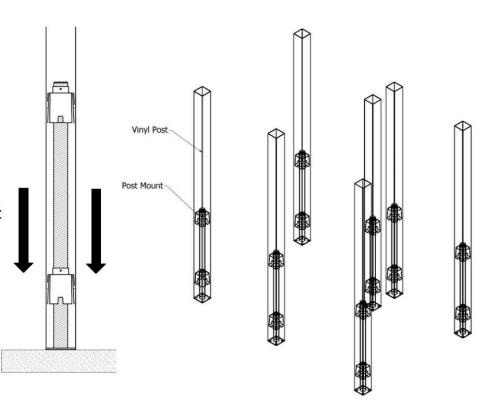

In-Ground Method:

- Dig a 3' deep by 10"
 diameter hole for each post
 footing. Use a Post Hole
 Digger when an Auger is
 not available.
 Ground
- Slide vinyl posts over 4x4 by 96" lumber so that 2 feet of lumber is extended below vinyl posts. Secure lumber to posts with screws below finish grade.
- Insert posts and doublecheck measurements. Pour pre-mixed concrete into holes and use a post level to make plumb.

Post Mount Method:

- Pre-drill four holes per mount using appropriate drill and bit sizes for your fastener.
- Secure with cement screw anchors for concrete, or lag bolts for wood surfaces.
- Cut vinyl posts to desired height with saw. Recommended post height is 84", or 90" with Louvered Roof.
- Slide vinyl posts over mounts.
 Vinyl posts can be secured to mounts with screws but is not required.

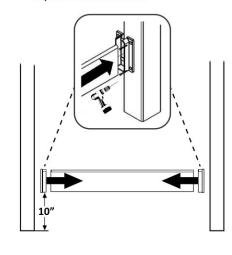

3. Wall Panel Installation

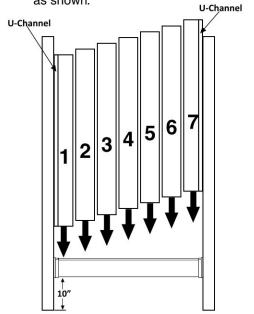

Step-1 Bottom Rail

- 1. Slide brackets onto bottom rail and lift into place between posts.
- Offset bottom brackets 10" above finish grade and center bottom rail on posts.
- Mount brackets to posts using 4 screws per bracket. Insert white caps to hide screws.

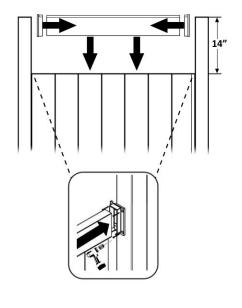

Step-2 Vertical T&G Boards

- Insert vertical T&G boards into bottom rail from left to right.
- Place U-Channels vertically on edges of T&G Boards #1 and #7 as shown.

Step-3 Top Rail

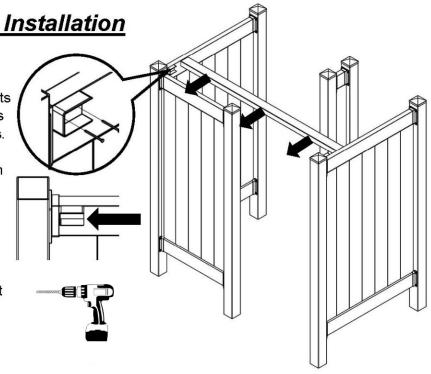

- Slide brackets onto top rail and place on top of vertical T&G boards.
- Mount brackets to posts using 4 screws per bracket. Insert white caps to hide screws.

4. Rail Transom Installation

- Install rail mounts on the interior side of top deco rails near door location. Rail mounts should be flush with deco rails and rest against wall brackets.
- Measure and cut rail transom to fit snuggly between rail mounts.
- 3. Slide rail transom into place and secure with **screws**.

Alternate: If assembly follows layout options 2 or 3, screw rail mount to wall of house and measure and cut rail transom accordingly.

Wall Panel and Rail Transom Instructions shown below are for "Louvered Wall" enclosures only.

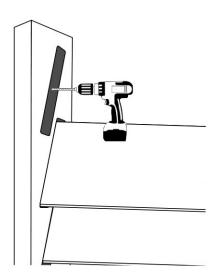

For Solid Wall enclosures, see previous page.

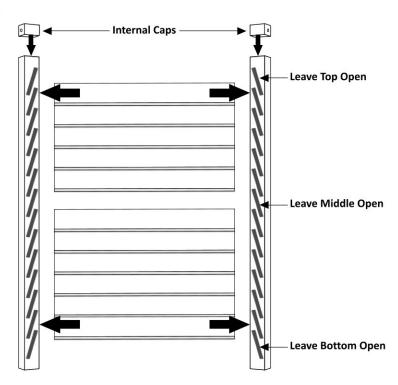

3. Louvered Wall Installation

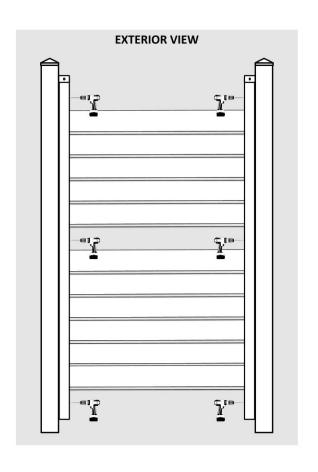

- Insert Louvers into pre-cut slots of 2x3-1/2" Vertical Supports leaving the top, middle, and bottom slots open.
- 2. Attach 2x3-1/2" Internal Caps to the top of Vertical Supports.
- 3. Lift Louvered Wall Panel into place between posts and hold to desired height. Have a friend help you with this step.

(If installing with Louvered Roof, leave 4" of clearance from the top of the post.)

 Fasten Vertical Support through exposed route/slots. Repeat for opposite side.

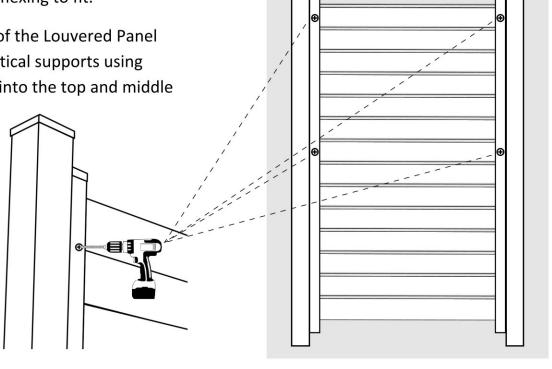

INTERIOR VIEW

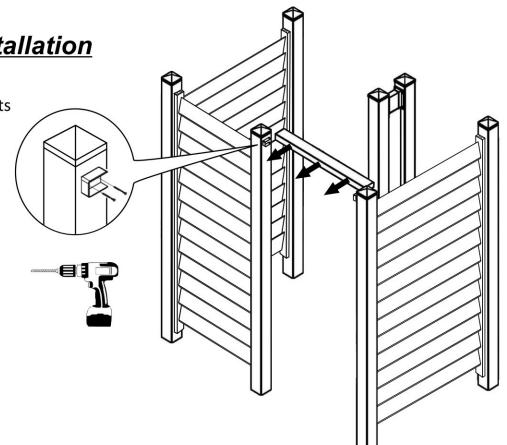

6. Secure the back of the Louvered Panel through both vertical supports using provided screws into the top and middle

areas.

4. Rail Transom Installation

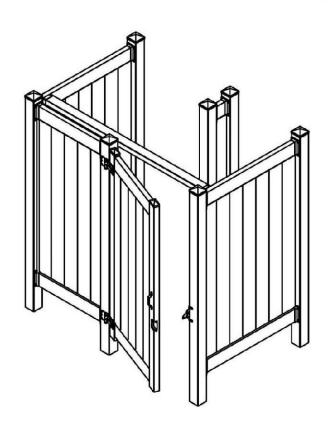

- 1. Install rail mounts on 4x4 posts near door location as shown.
- 2. Measure and cut rail transom to fit snuggly between rail mounts.
- 3. Slide rail transom into place and secure with screws.

5. Door & Hardware Self-Closing Hinge Brace (Interior Side)

- Attach door to post by first installing selfclosing hinges as shown. Once hinges are mounted to post, lift and screw hinges to door. Hinges have adjustable nuts that are used to center the door in the opening.
- 2. Orientate door so that the brace is on the interior side of the enclosure and the top of the door is flush with wall panels.
- Install gate handle and paddle latch at desired heights. Ensure that paddle latch components are aligned to allow the door to open and shut. Use adhesive to create a stronger bond for door caps.

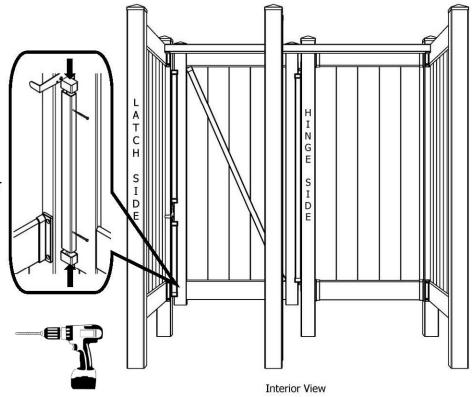

6. Privacy Strips (Hiney Hiders)

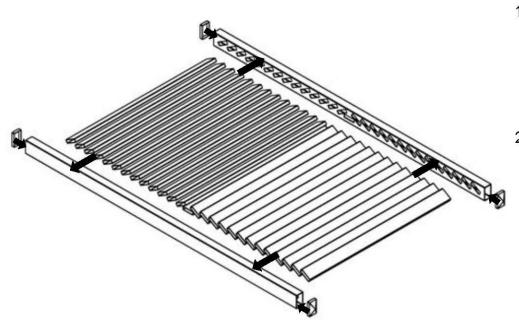

Measure and cut 7/8" x 1-1/2" vinyl strips to fit between door hardware. (paddle latch and hinges) Privacy strips cover gaps between door and posts but also act as door stops.

Cap privacy strips with 7/8" x 1-1/2" end caps. Apply **adhesive** for a stronger bond.

Mount privacy strips on posts behind door with **screws** provided. Strips should be installed with 7/8"side screwed to post.

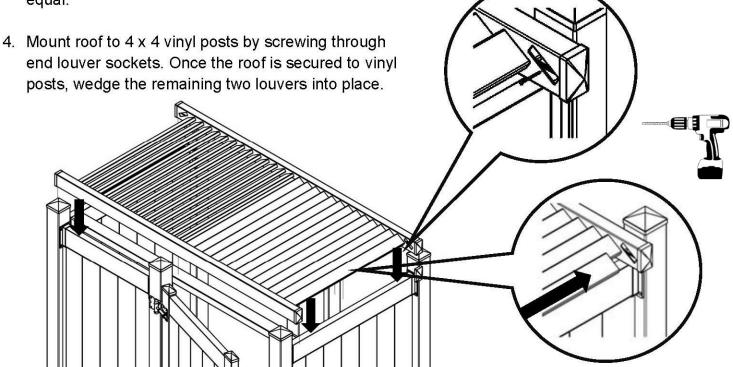

7. Louvered Roof

- Assemble Louvered Roof components as shown <u>except for two end louvers.</u> (Louvers, Roof Transoms, Caps)
- 2. Apply adhesive to roof caps for a stronger bond.

Louvered Roof (continued)

 Place Louvered Roof on Enclosure so that roof transoms rest on top deco rails and run parallel to door. Center roof so that over hangs are roughly equal. (If installing on top of Louvered Walls, place roof rails on top of 2x3-1/2" internal caps.)

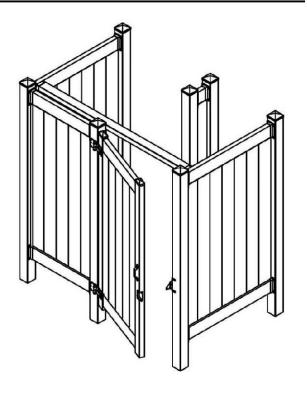

Thank you for purchasing your Liquid Sunshine Shower Enclosure, Now Enjoy!
